## Introduction

The Local Govemment Act 1999, requires Councils to prepare a Long Tem Financial Plan ("the Plan") covering a period of least ten (10) years. Council's Long Term Financial Plan is a key document in the overall strategic mana gement framework linking Council's Strategic Plans, Asset Mana gement Plan and Annual Business Plans.

The Plan is required to address the following key specific issues:

- The susta inability of the Council's fina ncial performance and position;
- The maintenance, replacement or development needs for infrastructure within its area;
- Proposals with respect to debt levels; and,
- Identification of any anticipated or predic ted changes that will have a signific ant effect upon the costs of the Council's activities/operations.
The financial projections contained within the Plan, provide an indication of the Council's direction and financial capacity, rather than predicting the future financial performance and position of the Council.

The Plan should be viewed as a guide to future actions or opportunities, which in tum encourages the Council to think about the future impact of decisions on the Council's long-term fina ncial susta inability.

## Our Financial Goal \& Targets

Council's primary financial goal is to ensure that financial sustainability is achieved to ensure Council is able to deliver its service effectively and effic iently well into the future.

Financial sustainability means having a financial position capable of meeting long tem service and infrastructure levels and standards, acceptable to the community, without substantial implemented increases in rates or cuts to services.

The Councils long term sustainability is dependent upon ensuring that, on average over time, the operating expenses are less than the associated revenues.

Financial sustainability implies faimess between generations, to ensure that today's ratepayers pay only for their share of the Council's assets. This means the cost of replacing assets which benefit existing ratepayers, are being funded by those ratepayers. To ensure that the Council delivers on its Financial Goal, the Council has committed to achieving the following financial outcomes:

## Outcome 1: A Balanced Budget

## Outcome 2: Rate Stability

## Outcome 3: Effective Infrastructure and Asset Management

## Outcome 4: Prudent Debt Management

To ensure our financial goals are achieved, the financial projections have been set with reference to the following outcomes and targets:

Outcome Indicator Target

| A Balanced Budget | Operating Surplus <br> Operating revenue less operating expenses | >\$0 |
| :---: | :---: | :---: |
|  | Operating Surplus Ratio <br> Operating Surplus as a percentage of Rate Revenue (exc. NRM Levy) | 0-10\% |
| Rate Stability | Annual Rate Revenue Increase | -5\% (exc. NRM Levy or Growth) |
| Effective Asset \& Infrastructure Management | Asset Sustainability Ratio <br> Net Asset Renewal Expenditure as a percentage of Depreciation Expense | 60-100\% |
| Prudent Debt Management | Net Financial Liabilities Ratio <br> Net Fina nc ial Lia bilities (Total Lia bilities less Liquid Assets) as a percentage of Operating Revenue | $<100 \%$ |
|  | Interest Cover Ratio <br> Net Interest asa percentage of Operating Revenue | $<2.5 \%$ |

## Key Influences \& Assumptions

The District Council of Ceduna provides a large variety of services which are provided in the context of the community's expectations as well as specific responsibilities which are set out in the Local Govemment Act 1999 and other relevant legislation.

As previously stated, the financial projections contained within the Plan, provide an indication of the Council's direction and financial capacity rather than predicting the future financial performance and position of the Council.

## The key assumptions underlying the Plan are;

Maintaining existing services at current service standards, the Plan is based on a "business as usual" assumption, which means that the Council will continue to provide the existing services at the current service levels.

The "business as usual" assumption does not take into account any change in direction or service level in response to community expectations and needs, legislative requirements or changing economic conditions.

In addition to the above assumption, the construction of the Thevenard Marine Unloading Facility has been included in 2016-17, with ongoing operating revenue and expenditure as a result of this project reflected from 2017-18. No further new asset ac quisitions are included in the Plan

## Rate revenue increases

General Rate revenue increases are assumed to be $1.35 \%$ above CPI, which reflects the combined impact of projected wages growth and service cost inc reases above CPI, whilst enabling Council to reach and maintain a sustainable operating position.

Service Charge revenue increases are assumed to be $3 \%$, which reflects the combined impact of projected wages and cost increases to deliver specific services associated with the individual charges.

## Cost Inc reases Compared with Consumer Price Index

The Reserve Bank of Australia has an inflationary target of between 2\% and 3\% per annum. Council hastaken the assumption for the Plan that the annual Consumer Price Index (CPI) will be $2.5 \%$ peryear.

Due to the nature of the price movements associated with goods and servicesconsumed by Local Govemment is somewhat different to the goods and services consumed by the 'a verage household', it is a ssumed that Councils non-salary costs will escalate at 4\% per annum.

The financial projections have assumed that wages and salary costs will inc rease by $3 \%$ per annum. All Council non- contract staff are parties to Enterprise Bargaining Agreements which cover periods of up to 2 years. As these Agreements will be renegotiated during the
planning timeframe, the potential for unforseen variations in the financial projections exist. Additional adjustments have been made from the years 2018-19 through 2022-23 to allow
for legislated increases in employee superannuation contributions from 9.5\% to $12.0 \%$ over this period.

## Asset Renewal and Replacement

The Council has in place Whole-of-Life Asset Plans for specific major classes of assets. The financial projections included in the Plan are based on the asset renewal and replacement programs outlined in the current Whole of Life Asset Plans. For other major classes of assets the financial projections included in the Plan are based solely on renewal and replacements being based on annual depreciation expenses attributed to that asset class.

Asset Management Plans are expected to be completed and reviewed in the near future on all asset classes a nd the Plan will be updated to reflect the outc omes of that review.

## Deprec iation

Depreciation is an expense that represents the consumption of an assets service potential, or put simply, its 'wear and tear'. Depreciation is based on the curent replacement value of an asset.

The Council is required to have an independent valuation of its major asset classesevery five (5) years. In the interim years, a desktop update of the replacement cost of assets is required to be undertaken. For all asset classes the a nnual revaluation a djustment has been projected to be CPI.

## Grants and Subsidies

The Council receives Grants and Subsidies from both the State and Federal Govemments to fund some of the services and programs which it provides to the community. For the pupose of the Council's Long Term Financial Plan it has been assumed that Council's existing Financial Assistance Operating Grants will continue to be provided in the future and have been indexed by CPI pa. All other Operating Grants have been provided in the future with no indexation a pplied.

The financial projections include Capital Grant revenue to assist in funding for specific new capital projects, in addition to Federal Roads to Recovery funding which has been projected to continue after the expiration of the current funding agreement in 2018-19.

## Funding

Based on the principle of 'intergenerational equity', the Long Term Fina ncial Pla n assumes that the Council will borrow to fund new assets and the upgrading of existing assets where necessary.

Interest rates on new borrowings are forecast to increase by $0.5 \%$ pa (currently $5.0 \%$ pa until a ceiling of $7.0 \%$ pa is reached. Interest rate on investment income, is forecast at 3.5\%

## Financial Targets \& Measures

The Plan has been developed with reference to a series of Targets. The Targets and Performance Measures have been selected to determine whether the Council is financially sustainable or moving to a position of financial sustainability. Financial Targets adopted by the Council to measure performance and financial sustainability are:

## Operating Surplus/ (Deficit)

Operating Surplus/ (Deficit) measures the extent operating revenue, is sufficient to meet all operating expenses including depreciation. As the major source of income for the Council is rates revenue.

## Target >\$0

## Operating Surplus/ (Deficit) Ratio

Operating Surplus ratio, measures operating surplus/ (deficit) as a percentage of rate revenue. This indicator represents the percentage by which the major controllable income source varies from the day to day operating expenditure.

Target 0-10\%

## Asset Sustainability Ratio

Asset Sustainability Ratio measures whether the Council is renewing or replacing existing physical assets (roads, footpaths, buildings etc) at the same rate the stock of assets is wearing out. The ratio is calculated by measuring capital expenditure on renewal or replacement of assets, relative to the recorded rate of depreciation of assets for the same period.

## Target 60-100\%

## Net Financial Labilities Ratio

A Council's indebtedness must be managed to ensure its lia bilities and associated costs are met without impinging on the fina ncial sustainability of the Council. Net Financial Liabilities ratio measures the extent net financial liabilities of the Council are met by its operating revenue.

## Target < 80\%

## Interest Cover Ratio

Interest Cover ratio measures the extent Council's commitment to interest expense is met by total operating revenue.

Target < 2.5\%

## Summary

Based on the principal assumptions used to establish the Plan, the financial projections indicate that the Council is in a position to achieve its primary financial goal of Financial Susta ina bility.

The Council's Operating Sumplus is progressively growing and its financial liabilities are dec lining, indic ating that the Council is a chieving financial susta inability.

Rate revenue increases are stable over the life of the Plan, indicating faimess between generations and that current and future ratepayers, pay only for their share of the Council's assets and services.

The financial projections contained within the Plan are meant to provide an indication of the Council's direction and financial capacity rather than predicting the future financial performance and position of the Council. This Plan should be viewed as a guide to future actions or opportunities which encourages Council to think about the future impact of decisions made today on the Council's long-term financial sustainability. To this end, reference is made each year to the Plan when preparing that Annual Budget to ensure that the broad financial outcomes of the Council are continuing to be met.

As with all Plans, there will be changes in circ umstances over the life of the Plan, therefore, the principal assumptions will be regularly reviewed by the Council to ensure the Council's strategic directionsand objectives, can continue to be delivered upon.
